11. [Payment Gateway](#11-payment-gateway)
12. [Operating Modes](#12-operating-modes)
13. [Troubleshooting](#13-troubleshooting)

1. Getting Started

First-Time Setup

1. **Open the app** - the permission screen appears.
 - Allow **Location**, **Nearby Devices**, and **Notifications**.
 - Tap "Allow" for each permission.
2. **Google Sign-In** (Cloud Mode only)
 - Tap "Sign in with Google" and select your account.
 - If you already have a cafe, select it from the list.
 - If new cafe, tap "Set up this cafe."

[!] **TESTING MODE:** Google Sign-In and Google Drive are still in testing.

Only registered tester accounts can use these features at this time.

3. **Select Mode** on the Role Select screen:
 - **QR Ordering Mode** - for cafes using customer QR ordering
 - **Wireless AP Mode** - LAN without internet
 - **Kiosk Mode** - counter without tables
4. **Setup Wizard** (if new cafe)
 - Select Operating Mode (Cloud / LAN / Kiosk)
 - Enter cafe details (Cafe Name, URL, etc.)

- Tap **Save**

Language

Tap the **Globe icon** at the top-right corner on any screen to switch language:

- BM (Bahasa Melayu)
- EN (English)
- ZH (Chinese)
- TA (Tamil)
- TH (Thai)

Theme

Tap the **Palette icon** to select a visual theme:

- Bold, Edgy, Elegant, Luxury, Minimalist, Soft

2. Main Screen - Table View

After login, you will see a **table grid** colored by order status:

Color	Meaning
Green	TABLE FREE - ready for customers
Red	OCCUPIED - active order in progress
Blue	SENT TO KITCHEN - order being prepared
Yellow	READY - food ready to serve

Table Actions

- **Tap a free table** - Opens a new order sheet
- **Tap an occupied table** - Opens order detail (pay, add items, send to kitchen)

Dashboard (Swipe Left Page)

Swipe **left** from the Table Grid to see the ****Dashboard**** - today's performance overview.

KPI Cards (5 cards at top)

Card	Meaning	Color
Revenue	Today's total income (RM)	Green
Orders	Order count today (+ yesterday comparison)	Blue
Avg	Average order value (RM)	Purple
Active	Currently active orders (unpaid)	Yellow
Cancelled	Cancelled count + percentage	Red if >10%, grey if low

Charts

Chart	What It Shows
Hourly Revenue (line)	Revenue by hour - spot peak times
Daily Trend (line)	Daily revenue over recent days - spot trends
Payment Methods (donut)	Payment method split (Cash vs QR vs Gateway)
Best Sellers (bar)	Top selling items today

How to Read the Dashboard

- **Revenue up, Orders up** - Good day, more customers
- **Revenue up, Orders flat** - Average order value increasing (customers ordering more)
- **Active high** - Many tables unpaid - may need more staff
- **Cancelled high (>10%)** - Check stock or investigate cancellation reasons
- **Hourly peak** - Know your busiest hours to prepare more ingredients

Main Buttons

Button	Function
+ (FAB bottom-right)	Create new dine-in order
Calculator (FAB bottom-left)	Quick calculator
(...) Overflow menu	Open full navigation menu

Overflow Menu (...)

[!] Requires **PIN Lock** if enabled.

Item	Function
Pending Kitchen Prints	View prints not yet sent
Recent Prints	Recent print history
Cafe Management	Manage profile, menu, tables, QR
Devices & Staff	Manage devices & staff invitations
Payment Monitor	E-wallet notification monitor
Notification Listener	Toggle on/off (Switch)
Drawer	Open cash drawer screen
Reports	Sales reports

Backup	Export/Import data
Settings	All settings
Sign Out	Close session
Sign Out with Closing	Close session + closing report

3. Cafe Management

Access: **Menu (...)** > **Cafe Management**

3.1 Cafe Profile

Field/Button	Description
Cafe Name (text field)	Name shown on receipts & website
Logo (Pick Logo / Change Logo)	Upload cafe logo (image file)
Capture Location (button)	Capture GPS coordinates of cafe location
Radius (number field)	Maximum distance staff can check-in (meters)
Timezone	Time zone displayed (auto-detect)
Payment QR (Upload/Replace/Remove)	E-wallet payment QR code for display
Menu Preset (Load Preset)	Load a ready-made menu template
Cancel / Save (bottom bar)	Discard or save changes

3.1.1 Uploading Cafe Logo

The cafe logo appears in **three places**:

- On **printed receipts** (top of thermal receipt)
- On **table QR cards** (if Logo mode is selected during QR generation)
- On the **customer digital menu** (QR ordering website)

Steps:

1. Open **Cafe Management > Cafe Profile**
2. Tap the **"Pick Logo"** button (or **"Change Logo"** if one already exists)
3. Select an image from your device gallery
4. Logo preview is shown - make sure it looks clear at small size
5. Tap **Save** on the bottom bar to save

Tips for receipt logo:

- Use a **black-and-white or high contrast** image - thermal printers don't print color

- Recommended size: **300x300 pixels** minimum

- Logo is auto-cropped to square

- Format: JPG or PNG

[i] **Note:** The same logo is used for receipts AND table QR cards. If you want

different branding on QR cards, use "Text" mode (cafe name only) in Generate Table QR.

3.1.2 Logo Locations Summary

Location	Logo Source	How to Change
Printed receipt	Logo from Cafe Profile	Change at Cafe Profile > Pick Logo > Save
Table QR card	Logo from Cafe Profile OR text cafe name	Select mode in Generate Table QR screen
Customer online menu	Logo from Cafe Profile	Same - change in Cafe Profile

3.2 Menu Management

Access: Cafe Management > Menu Management

3.2.1 Creating a New Category

1. Tap the **Folder icon** in the top bar
2. Enter the category name (e.g., "RICE", "DRINKS", "SEAFOOD")
3. Tap **OK**
4. New category appears as a new tab

3.2.2 Setting Kitchen Slip Route for a Category

Each category has a **Kitchen Slip Route** that determines which printer prints items in that category. This lets you route food orders to the kitchen and drinks to the bar.

1. **Long-press** on the category tab
2. Select **Edit** from the popup menu
3. In the Category Editor dialog:
 - Enter display names in multiple languages:
 - English
 - Bahasa Melayu
 - Chinese
 - Tamil
 - Thai
 - Select **Kitchen Slip Route**:
 - **Food** - Items in this category print on the FOOD kitchen slip
 - **Beverage** - Items in this category print on the BEVERAGE kitchen slip

4. Tap **Save****[i] Example Setup:**

- Categories "RICE", "SIDE DISHES", "FRIED" > Route: **Food** > prints on kitchen printer

- Categories "DRINKS", "ICED", "HOT" > Route: **Beverage** > prints on bar printer

[i] Note: If you only have one kitchen printer, both routes (Food & Beverage) will

print on the same printer. Route only matters if you have two separate printers.

3.2.3 Reordering Categories

1. Tap the **Reorder icon** in the top bar
2. Use up/down buttons to rearrange category order
3. This order determines the tab sequence on the ordering screen

3.2.4 Sorting Items Within a Category

1. Tap the **Sort icon** in the top bar
2. Choose **Auto-sort** (alphabetical A-Z) or manual sort with up/down buttons

3.2.5 Deleting a Category

1. **Long-press** on the category tab
2. Select **Delete**
3. Warning: All items in that category will become uncategorized

3.2.6 Adding a New Menu Item

1. Select the desired category tab
2. Tap **+** (FAB) or the Add icon in the top bar
3. Fill in the item form:

Step 1 - Select Category:

- Choose a category from the list
- Or tap "New category" to create one inline

Step 2 - Fill Item Details:

Field	Description	Required?
Category	Primary category for the item (already selected)	Yes
Also show in (FilterChips)	Show this item in additional categories too	No
Code	Short code (for quick search)	No
Name BM	Name in Bahasa Melayu	Yes
+ Other Languages (expandable)	Add names in EN, ZH, Tamil, Thai	No

Pricing Mode:

Mode	When to Use	What to Fill
Single Price	Item with one size/price only	Enter price (e.g., RM 8.00)
Multiple Price	Item with S/M/L sizes	Enter 3 prices: Small, Medium, Large
Market Price	Price changes daily (e.g., fish, prawns)	No price entered - asked each day

Multiple Price Example:

Small (S): RM 3.00 - Small Iced Tea
 Medium (M): RM 4.50 - Medium Iced Tea
 Large (L): RM 6.00 - Large Iced Tea

Additional Toggles:

Toggle	Function
Do not translate (Switch)	Item name won't be auto-translated to other languages
Ask me daily (Switch)	Popup will ask daily whether this item is available today

Item Image:

- Tap the image button to upload a photo of the item
 - This image appears on the customer digital menu (QR ordering)
4. Tap **Save**

3.2.7 Editing a Menu Item

1. On the item list, **swipe left** on the item
2. Tap the **Edit** (pencil) icon
3. Change any fields as needed
4. Tap **Save**

3.2.8 Deleting a Menu Item

1. **Swipe left** on the item
2. Tap the **Delete** (red trash) icon
3. Confirm deletion in the dialog

3.2.9 Toggle Item Availability

- Each item has a **Switch** on the right side
- **ON** = available today (shown on menu)
- **OFF** = unavailable (hidden from customers, greyed on admin)

[i] Useful for items that are out of stock today - turn off without deleting.

3.2.10 Example Warung Menu Setup

RICE (Route: Food)

Nasi Putih	RM 2.00 (Single Price)
Nasi Goreng	RM 8.00 (Single Price)
Nasi Lemak	RM 6.00 / 8.00 / 10.00 (Multiple: S/M/L)

SIDE DISHES (Route: Food)

Ayam Goreng	RM 5.00 (Single Price)
Ikan Bakar	Market Price (asked daily)
Udang Masak Lemak	Market Price

DRINKS (Route: Beverage)

Teh Ais	RM 3.00 / 4.50 / 6.00 (S/M/L)
Kopi O	RM 2.50 (Single Price)
Plain Water	RM 0.00 (Single Price, free)

3.3 Tables Management

Only available in Table Service mode (not in Kiosk)

Access: Cafe Management > Tables Management

3.3.1 Adding a New Table

1. In the **Label** field, enter a table name/label (e.g., "Table 1", "VIP", "Outdoor")
2. Tap **Add**
3. Table is added with an auto-generated ID (T0001, T0002, ...)

[i] Table IDs are auto-generated and cannot be changed. The label is the displayed name.

Limit: Maximum tables depends on your plan (see counter on screen).

3.3.2 Adding Take-Out Slots

1. In the **Take-out** section, tap ****Add Take-out****
2. Take-out slots appear separately from dine-in tables
3. Use for customers taking away - no table QR needed

3.3.3 Renaming a Table

1. Tap the **Edit (pencil) icon** on the right side of the table
2. The label field becomes editable (inline)
3. Change the name, then tap **Save**
4. Or tap **Cancel** to discard

3.3.4 Deleting a Table

1. Tap the **Delete (red trash) icon** on the right side of the table
2. Table is deleted immediately

[!] **Warning:** Do not delete tables that have active orders. Complete orders first.

3.3.5 Information Shown Per Table

Info	Description
Label	Table name (editable)

ID	Auto-generated unique code (T0001, etc.) - cannot be changed
-----------	--

3.3.6 Example Table Setup

Dine-In (12 tables):

T0001 - "Table 1"

T0002 - "Table 2"

...

T0010 - "Table 10"

T0011 - "VIP 1"

T0012 - "VIP 2"

Take-Out (3 slots):

TW001 - "Takeaway 1"

TW002 - "Takeaway 2"

TW003 - "Takeaway 3"

3.4 Generate Table QR (Print Table QR Cards)

Only available if web ordering is active (Cloud Mode with website)

Access: Cafe Management > Generate Table QR

Generates table QR cards in PDF format (A6 per card, 4 cards per A4 page) for printing

and placing on each table. Customers scan these QR codes to order without waiting for staff.

3.4.1 Steps to Generate Table QR

1. Open **Cafe Management > Generate Table QR**
2. **Select card header** (what appears above the QR on each card):
 - **Text** - Cafe name (from Settings) printed as text
 - **Logo** - Cafe logo (from Cafe Profile) printed as image
3. **Select tables** - check the boxes for tables you want:
 - Shows: table label + ID
 - Count displayed: "(3/12 selected)"
 - You can select all or just specific tables
4. Tap **"Generate PDF"** button
5. Wait until PDF is ready
6. After generation:
 - Tap **"Share"** (link icon in top bar or button below) to:
 - Send to printer (Print)
 - Save to Files
 - Share via WhatsApp/email
 - Or tap **"Generate New PDF"** to regenerate with different selections

3.4.2 QR Card Format

Each card contains:

```

+-----+
| [LOGO / NAME] | <- Header (logo or text)
|
| +-----+
| | QR CODE |
| |
| +-----+
|
| Table 1 (T0001) | <- Label + Table ID
+-----+

```

3.4.3 Printing Tips

- **Paper:** Use regular A4 paper or sticker paper
- **Printer:** Any printer connected to the device (Bluetooth/WiFi/USB)
- **Laminate:** Recommended to laminate cards for durability
- **Placement:** Use acrylic stands or paste directly on tables
- **If tables added:** Regenerate PDF for new tables only (select only the new ones)

3.5 Payment Gateway Settings

Only available in Cloud Mode

See Section [11. Payment Gateway](#11-payment-gateway).

4. Settings

Access: Menu (...) > Settings

4.1 Staff Permissions

Toggle	Function
Staff can send to kitchen	Allow staff to send orders to kitchen
Staff can take payment	Allow staff to accept payments

4.2 Default Language

Dropdown	Who Uses It
Admin language	Language of admin screen
Ordering language	Language of staff ordering screen
Customer language (Cloud)	Language of customer online menu
Printer language	Language on receipts/kitchen slips

4.3 Customer Order (Cloud only)

Field/Toggle	Function
Auto-print to kitchen (Switch)	Customer orders go straight to kitchen, or hold first
Hold before kitchen (Chip: 10s/15s/30s/60s)	How long to hold before sending
Today's Special (text field)	Promotional text shown on customer menu today

4.4 Reports

Field	Function
Business Day Start (dropdown, hour)	When business day begins (e.g., 8 AM)
Business Day End (dropdown, hour)	When business day ends (e.g., 11 PM)

4.5 Security

Item	Function
PIN Lock (Switch)	Lock admin screen with PIN
Change PIN (button)	Change existing PIN
Unlink Device (button)	Disconnect this device from the cafe

4.6 Printing & Hardware

Item	Destination
Printers	Manage printers (Bluetooth/Sunmi/USB/Network)
Devices & Hardware	Customer Display settings
Cash Drawer	Cash drawer settings screen
Background Setup	Keep-Alive settings (prevent Android from killing app)
Show print status (Switch)	Display print status on screen

4.7 Alert Sound

Item	Function
Current sound (label + Choose button)	Select new order notification sound
Volume (Slider 0-100%)	Adjust alert volume
Test (button)	Preview the selected sound

4.8 Screen

Toggle	Function
Fullscreen (Switch)	Hide system bars (full kiosk mode)

4.9 Ambient / Screensaver

Item	Function
Enable (Switch)	Activate auto screensaver
Start After (FilterChips)	Idle time before activation (1/2/3/5/10 min)
Guest-visible screen (Switch)	Show useful info for customers during ambient

4.10 About

Button	Function
Open Source Licenses	View open source software licenses

5. Devices & Staff

Access: Menu (...) > Devices & Staff

5.1 Staff Invitation (QR Ordering Mode)

Item	Function
QR Code (display)	Show to new staff device to scan
Share (button)	Share invite link via WhatsApp/etc
Regenerate (button)	Create new invite code (cancels old one)
LAN Address	WiFi address for joining LAN

5.2 Secondary Admin (Cloud only, Main Admin only)

Item	Function
Add Secondary Admin (button)	Generate QR invite for second admin
Add Operator (button)	Generate QR invite for operator (RAZStudio)
QR + Share + Regenerate	Same as Staff Invitation

5.3 Owner Recovery Key (Cloud only)

Button	Function
Show Owner Recovery QR	Display owner recovery QR key (30 seconds)

[!] **IMPORTANT:** Save a screenshot of this QR in a safe place. It is needed if

you lose access to the main device.

5.4 Connected Devices

Each connected device is shown as a card:

Action	Function
Approve	Approve new device
Reject	Reject new device
Revoke	Cancel access for existing device
Force Check-Out	Force check-out staff who forgot
Rename	Change device name
Promote to Main	Upgrade to Main Admin

6. Payment

6.1 Normal Payment Flow

1. Tap a table with an active order
2. On the **Order Detail Sheet**, tap a pay button:
 - **Pay Cash** - Enter amount given, calculate change (numpad calculator)
 - **Pay QR** - Display QR for customer to scan (e-wallet)
 - **Pay [Gateway]** - Payment via gateway (Touch 'n Go, DuitNow, etc.)
3. Receipt is printed (if printer connected)
4. Table turns green again

6.2 Split Payment

1. Tap table > Order Detail Sheet
2. Tap **Split Payment**
3. Select items to be paid by the first customer
4. Choose payment method (Cash/QR/Gateway)
5. Repeat for next customer
6. Final balance is paid as normal

6.3 Send to Kitchen

- After an order is created, tap **"Send to Kitchen"**
- Kitchen slip auto-prints (if auto-print enabled)
- Status changes to SENT_TO_KITCHEN

6.4 Cancel Order

- On Order Detail Sheet, tap **Cancel Order**
- Enter cancellation reason
- Order is marked CANCELLED (cannot be paid anymore)

7. Reports

Access: Menu (...) > Reports

7.1 Period Selection

Option (FilterChip)	Meaning
Today	Today only
This Week	This week
This Month	This month
Custom	Select start & end date (date picker)

7.2 Report Cards

Card	Contents
Summary	Total orders, gross total, average order value
Payment Split	Breakdown of Cash vs QR vs Gateway
Per-Table	Revenue per table
Best Sellers	Most popular items (overall)
Top per Category	Top items in each category
Cancelled Orders	Summary of cancelled orders
Cash Drawer Openings	How often the drawer was opened

7.3 How to Read Reports

- **Summary > Total Orders** - How many customers served in the period
- **Summary > Gross Total** - Total revenue before any deductions
- **Summary > Average** - Average spend per customer (gross / orders)
- **Payment Split** - Which payment method customers prefer (helps decide if you need more QR/gateway options)

- **Per-Table** - Which tables generate the most revenue (useful for layout decisions)
- **Best Sellers** - What to stock more of; what to promote
- **Cancelled Orders** - If cancellation rate >10%, investigate why

7.4 Export / Print Reports

1. Scroll to the bottom of the Reports screen
2. Tap **"Export PDF"** button
3. A PDF file is generated
4. The Android **Share sheet** opens automatically - choose:
 - **Print** - Send directly to a connected printer
 - **Save to Files** - Store locally
 - **WhatsApp/Email** - Send to yourself or partners

7.5 Bill History (Receipt Search)

Access: Reports screen > tap the ****Receipt icon**** in the top bar

1. A **search box** appears at the top
2. Type any of:
 - Bill number
 - Table name/ID
 - Item name
 - Payment method (e.g., "CASH", "QR")
3. Results appear as cards showing: order ID, table, total, payment method, time
4. **Tap a bill** to see full details (all items, notes, amounts)
5. In the detail dialog, tap **"Reprint"** to reprint that receipt

[i] Search runs against the local database - fast even with years of history.

8. Cash Drawer

8.1 Cash Drawer Settings

Access: Settings > Cash Drawer

Item	Function
Enable cash drawer (Switch)	Enable/disable physical drawer kick
Kick through (radio list)	Select which printer opens the drawer
Cash Drawer PIN (Set/Change)	Set a PIN for manual drawer opening

[i] **Note:** Disabling the drawer does NOT stop cash records. Every cash sale, float,

and cash-out is still recorded - only the physical kick is turned off.

8.2 Cash Drawer Screen

Access: Menu (...) > Drawer

Item	Function
Expected Balance (RM display)	Expected cash amount in the drawer
Opening Float (numpad + Save)	Enter starting cash for the day
Cash Out (button)	Remove cash > Numpad + PIN + "Take out"
Audit Trail	List of all drawer events (open, close, sale, cash out)

9. Backup & Restore

Access: Menu (...) > Backup

9.1 Export

Button	Function
Export	Generate backup file (.json)
Share	Share backup file via WhatsApp/email/etc

9.2 Import

Step	Description
1. "Select Backup File"	Pick .json file from storage
2. Preview	See version, date, item counts
3. "Restore"	Restore data (existing data will be erased!)

9.3 Google Drive (Cloud only)

[!] **TESTING MODE:** Google Drive integration is still in testing. Only registered

tester accounts can use this feature.

Button	Function
Save to Google Drive	Save cafe bundle to Drive
Remove	Delete bundle from Drive (requires confirmation)

10. Payment Monitor

[!] **ALPHA:** Payment Monitor / Notification Listener is still in alpha phase.

This feature is being tested and may not work fully on all devices. Do not rely

solely on it for payment verification.

Access: Menu (...) > Payment Monitor

Monitors e-wallet notifications and automatically matches incoming payments with active orders.

10.1 Permission Status

Item	Function
Notification Access (status)	Must be granted for the listener to work
"Open Notification Settings"	Opens Android system settings
Battery Optimization (status)	Should be disabled
"Disable Battery Optimization"	Request bypass from Android

10.2 Schedule

Listener is active only during business hours (follows Business Day Start/End from Settings).

10.3 Listener Settings

Item	Function
Enable Payment Listener (Switch)	Turn listener on/off
Monitored Apps (Checkboxes)	Select e-wallets to monitor
- Touch 'n Go	Check/uncheck
- GrabPay	Check/uncheck
- Boost	Check/uncheck
- ShopeePay	Check/uncheck
- MAE by Maybank	Check/uncheck
- CIMB Clicks	Check/uncheck
Auto-start on boot (Switch)	Start automatically when device restarts

10.4 Alert Settings

Toggle	Function
Sound (Switch)	Play sound when payment captured
Vibration (Switch)	Vibrate when payment captured
Toast Notification (Switch)	Show brief popup

10.5 Recent Payments

List of captured payments - each card shows:

- Amount (RM)
- Wallet app
- Sender (if available)
- Timestamp
- Match status: **MATCHED** (green), ****AMBIGUOUS**** (yellow), ****UNMATCHED**** (grey)

11. Payment Gateway

Access: Cafe Management > Payment Gateway Settings

Only available in Cloud Mode

11.1 Select Provider

Scrollable FilterChip bar - tap the provider you use (e.g., Touch 'n Go, DuitNow).

11.2 Credential Fields

Field	Description
Depends on provider	Enter Merchant ID, Secret Key, etc.
Secret fields (masked)	Not displayed after saving
"already set" placeholder	Means key is already stored on server

11.3 Toggles

Toggle	Function
Sandbox mode (Switch)	Test mode (OFF = production, requires confirmation)
Enabled (Switch)	Enable/disable this provider

11.4 Payment Channels

Each payment method has its own Switch:

- Toggle ON/OFF depending on which methods your cafe accepts

11.5 Save

Tap **Save** after completing configuration.

12. Operating Modes

12.1 Cloud Mode (QR Ordering)

- Requires internet
- Customers can scan table QR to order themselves
- Multiple devices can connect
- All data in cloud (Supabase)
- Supports Payment Gateway

12.2 LAN Mode (Wireless AP)

- No internet needed - local WiFi only
- One device acts as Host, others Join
- Data stored on Host device
- **Host this cafe** > Show pairing QR
- **Join this cafe** > Scan QR to join

12.3 Kiosk Mode

- Single device only
- No tables - orders numbered (running number)
- Suitable for counters/food trucks
- Pay immediately after ordering

Switching Modes

1. Main screen > **Setup Wizard** (footer on RoleSelectScreen)
2. Select new mode
3. Fill in required information
4. Tap **Save**

[!] Switching modes may affect existing data. Create a backup first.

13. Troubleshooting

App crashes / Force close

- Make sure all permissions are granted
- Ensure sufficient storage space
- Try: Settings > Apps > Warung Tom Yam > Clear Cache

Printer not working

- Check Bluetooth/USB connection
- Make sure printer is selected in Settings > Printers
- Try "Test Print" on the Printers screen

Orders not reaching kitchen

- Check kitchen printer is connected
- Check "Auto-print to kitchen" setting (Settings > Customer Order)
- Make sure category slip route is correct (Menu Management > Edit Category)

Staff cannot check-in

- Check staff device GPS is turned on
- Check radius in Cafe Profile is sufficient
- Make sure "Capture Location" was done on the admin device

Cash drawer won't open

- Check "Enable cash drawer" (Switch) in Cash Drawer Settings
- Check that the connected printer supports cash drawer
- Make sure printer is selected in "Kick through"

Payment Monitor not capturing payments

- Open Settings > Notification Access > allow this app
- Disable Battery Optimization for this app
- Make sure the correct e-wallet apps are checked in Monitored Apps
- Make sure current time is within Business Hours

Split payment fails

- This usually happens if "Auto-print to kitchen" is turned off
- Orders must be in SENT_TO_KITCHEN status before they can be paid
- Make sure the order was sent to kitchen before attempting split

Lost admin access

- Use **Owner Recovery QR** (if you have a screenshot)
- Scan that QR on a new device
- Or contact RAZStudio support

Important Notes

1. **Save Owner Recovery QR** - this is the only way to recover access if the device is lost
2. **Regular backups** - Export backup at least weekly
3. **PIN Lock** - Enable to prevent unauthorized access to Settings
4. **Cash Drawer PIN** - Set to prevent staff from opening the drawer arbitrarily
5. **Stable WiFi** - For Cloud Mode, ensure a stable internet connection at all times
6. **Keep app updated** - Always use the latest version for fixes and new features

Feature Status

Feature	Status	Note
Google Sign-In	[TEST] Testing	Registered tester accounts only

Google Drive Backup	[TEST] Testing	Registered tester accounts only
Payment Monitor / Notification Listener	[ALPHA] Alpha	Early development, may be unstable
All other features	[OK] Production	Stable and ready for use

This document was generated based on the Warung Tom Yam POS app source code v1.0.
